

CBI2420A ALL In One

Input: Single-phase 115 - 277 Vac; 600W
Output Load: power supply 24 Vdc; 25 A
Output Battery: charging 24 Vdc; 25 A
 Suited for the following battery types: Open Lead Acid, Sealed Lead Acid, lead Gel and Ni-Cd, Ni-MH, Li-Ion
 Automatic diagnostic of battery status.
 Charging curve IUoU, constant voltage and constant current Battery Life Test function (Battery Care)
 Switching technology Four charging levels: Recovery, Bulk, Absorption, Boost, and Float
 Protected against short circuit and inverted Batt. polarity
 Signal output (contact free) for discharged or damaged battery
 Signal output (contact free) for Mains or Back-UP
 Modbus RTU for all parameter, Battery and System
 Protection degree IP20 - DIN rail; Space saving

Technical features

Thanks to the All In One units (DC-UPS), it will be possible to optimize power management. The available power is automatically allocated between load and battery, supplying power to the load is the first priority of the unit thus it is not necessary to double the power, because also the power going to the battery will go to the load if the load so requires. The maximum available current on the load output is 2 times the value of the device rated current I_n . We call "Battery Care" the concept base on algorithms that implement rapid and automatic charging, battery charge optimization during time, flat batteries recovery and real time diagnostic during installation and operation. The Real Time Auto-diagnostic system, monitoring battery faults such as, battery Sulfated, elements in short circuit, accidental reverse polarity connection, disconnection of the battery, they can easily be detected and removed by help of Blink Code of Diagnosis Led; during the installation and after sell. The continuous monitoring of battery efficiency, reduces battery damage risk and allows a safe operation in permanent connection. Each device is suited for all battery types, by means of jumpers it is possible setting predefined curves for Open Lead Acid, Sealed Lead Acid, Gel, Ni-Cd (option). They are programmed for two charging levels, boost and charge, but they can be changed to single charging level by the user. A rugged casing with bracket for DIN rail mounting provides IP20 protection degree. They are extremely compact and cost-effective.

Norms and Certifications

In Conformity to: EN60950 / UL60950-1 and CSA C22.2 No. 60950-1-07 (Information Technology Equipment) – Safety – Part1: General Requirement. Electrical safety; EN54-4 Fire Detection and fire alarm systems; 89/336/EEC; EMC Directive 2014/30/UE and Low voltage Directive 2014/35/UE; Safety EN IEC 62368-1: 2014/AC:2015; DIN41773 (Charging cycle); Emission: IEC 61000-6-3; Immunity: IEC 61000-6-2. CE.

Lifetime Expectancy

Life Time Expectancy defines the minimum life expectancy of the device in hours of operation. Being a device designed with electrolytic capacitors, the maximum duration is defined at 15 years - 131,400 h. Any value higher than this is to be considered only as a theoretical duration, calculated to be able to compare devices with each other.
